The expansion module with high-resolution colour display

The D7C extension module has a high-resolution colour display and connects to Snom D7xx phones via USB plug & play. With the help of the 16 physical (48 virtual) freely programmable and multi-coloured SmartLabel LED function keys, the status of colleagues can be quickly recognised and the corresponding number dialled or a call forwarded. For a comprehensive overview, you can connect up to

three D7C in series and extend the range of functions. The power supply runs through the phone via USB and the module can be configured the existing telephone system or the Snom web interface. The display supports multiple styles and icons and custom background images can be applied. The Snom D7C is the colourful and informative extension module for selected phones of the Snom D7xx series.
